DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 5-10, 14-17, 28-31, 34-43, 48-51, and 70 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Publication 2002/0113966 to Shchegrov et al. in view of U. S. Patent No. 6,219,142 to Kane are references closest to the claimed invention. Shchegrov et al. in combination with Kane disclose a method of determining a first actual profile associated with a first grating comprising: receiving a set of measurements associated with a signal indicative of diffraction from the grating; generating actual spectrum signal data associated with the grating; selecting a first trial profile; generating a first trial spectrum signal data associated with the first trial profile; and comparing the first trial spectrum signal data to the first actual spectrum signal data;. However, Shchegrov et al. in combination with Kane do not disclose determining parameter values for a second trial profile using at least one optimization technique based on the comparison of the first trial spectrum signal data to the first actual spectrum signal data, wherein the second trial profile is associated with a second sample trial spectrum signal data, and wherein the second trial profile matches the first actual profile more closely than the first trial profile and storing the second trial profile and the second sample trial spectrum signal data in a dynamic library of profiles; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
